Separate paging is given to this Part in order that it may be filed as a separate compilation

## PART III—SECTION 2

Notifications and Notices issued by the Patent Office relating to  
Patents and Designs

## THE PATENT OFFICE

## Patents and Designs

Calcutta, the 15th August 1959

## Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

30th July 1959

68571. A. V. Swaminathan, Machines for the manufacture of wire nails and panel pins.
68572. Chatons Private Limited. An improved process for silvering the imitation stones and the like.
68573. Chatons Private Limited. An improved process of manufacturing imitation stones and the like.
68574. Jayanand Khira & Co. Private Limited. Improved screw or the like for attaching and detaching legs or the like of wooden furniture.
68575. Khira Steel Works Private Limited. An improved folding cot and the like.
68576. Metropolitan-Vickers Electrical Company Limited. Improvements relating to A.C. bridges. (7th August 1958).
68577. H. C. Andrews. Improvements in or relating to green tea leaf sifters and like machines.
68578. Food Machinery and Chemical Corporation. Bleaching of cellulosic fabrics. (18th August 1958).
68579. British Insulated Callender's Cables Limited. Improvements in or relating to section insulators for use in overhead conductors of electric traction systems. (6th August 1958).
68580. British Insulated Callender's Cables Limited. Improvements in or relating to section insulators for use in overhead conductors of electric traction systems. (29th May 1959).
68581. J. R. Geigy A.G. Process for obtaining an isoquinoline alkaloid from conopharyngia species.
68582. Bristol Laboratories Inc. Therapeutic preparation.
68583. Vereinigte Österreichische Eisen-und Stahlwerke Aktiengesellschaft. Installation for refining crude iron.
68584. Merck & Co., Inc. Preparation of pregnadiene compounds. (8th September 1958).
68585. Merck & Co., Inc. 16-methyl-4, 6-pregnadienes. (1st October 1958).
68586. Accumulatoren-Fabrik Aktiengesellschaft. Electric lead accumulator.

31st July 1959

68587. N. I. Gajjar. Perforated tacchak—a heat conveyor. ("Tacchak" is Gujarati word for plate used to cover the utensils.

68588. Metal Containers (Installations) Limited. Metal container and method of making the same.
68589. Potasse et Engrais Chimiques. Improvements in the manufacture of complex fertilizers.
68590. Robin-Nodwell Mfg. Ltd. Hole opener and casing setter.
68591. Union Carbide Corporation. Electric arc spraying (28th April 1959). [Addition to No. 59399].
68592. The A.P.V. Company Limited. Separation of low boiling point impurities from hydrocarbons.
68593. Stamicarbon N.V. Urea preparation.
68594. British-American Tobacco Company Limited. Method of and apparatus for the drying of tobacco.
68595. British-American Tobacco Company Limited. Improvements relating to drying chambers.
68596. British-American Tobacco Company Limited. Improvements relating to filters for tobacco smoke. (8th August 1958).
68597. Ciba Limited. Manufacture of new quinone derivatives.

1st August 1959

68598. Montecatini Societa Generale Per L'Industria Mineraria e Chimica and K. Ziegler. Improvements in the process for the production of films from synthetic high polymers.
68599. Riker Laboratories, Inc. Orally-active therapeutic compositions.
68600. Yuasa Battery Company. Glassfibre-tube-type plate for electric storage cell and battery.
68601. The British Drug Houses Limited. Organic compounds. (11th August 1958).
68602. Molybdenum Corporation of America. Rare earth metal salts and their preparation.
68603. Koppers Company, Inc. Improvements in or relating to ozonolysis of coal-tar products.
68604. Aktiebolaget Bofors. Servo system working with vectors.
68605. Westinghouse Brake & Signal Company Limited. Improvements relating to electromagnetic relays. (8th September 1958).
68606. British Insulated Callender's Cables Limited. Improvements in or relating to stranding machines. (5th August 1958).
68607. Corn Products Company. Starch manufacturing process. [Addition to No. 59878].
68608. Glaxo Laboratories Limited. Improvements in or relating to the preparation of steroids. (7th August 1958).
68609. Glaxo Laboratories Limited. Improvements in or relating to steroid derivatives. (8th August 1958).

68610. The Goodyear Tire & Rubber Company. Improvements in method of concentrating latex.

3rd August 1959

68611. Council of Scientific and Industrial Research. A new method of generating electrical power from the atmosphere.

68612. Westinghouse Brake & Signal Company Limited. Improvements relating to counting chain circuit arrangements. (13th November 1958).

68613. The British Screw Company Limited. A new or improved sealing means for bolts. (19th August 1958).

68614. Automatic Coal Cleaning Company Limited. Improvements relating to mechanical filters. (20th August 1958).

68615. The Goodyear Tire & Rubber Company. Molding inflatable articles.

68616. Albert David Limited. Improvement in or relating to an organic compound of iron of therapeutic value and the manufacture thereof.

68617. Albert David Limited. Improvement in or relating to an organic compound of therapeutic value and the manufacture thereof.

68618. Kehar Singh Shanker Singh & Bros. Chaff cutting machines.

68619. General Foods Corporation. Process for classifying a cereal flour.

68620. Montecatini Societa Generale Per L'Industria Mineraria e Chimica. Process for the preparation of an N-monoalkylamide of O, O-dimethylthiophosphorylacetic acid.

68621. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to devices for pulling up crystals from a melt.

68622. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to cinematograph film projectors provided with an axially resilient coupling member in the drive between an intermittently driving roller and a continuously driven shutter.

68623. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to methods of producing silicon bodies.

68624. Ciba Limited. Manufacture of new hydrazones.

68625. Riker Laboratories, Inc. Novel anti-lipemic agents.

68626. J. Gremillet. Machine for typewriting, accounting or not, or for stenotyping or teleprinting, enabling the simultaneous striking of several characters and space keys single or multiple.

68627. L. A. Boriolo. Containers for electrodes of storage batteries, of fibrous material, and method for their production.

4th August 1959

68628. P. B. Menon. Power controller for A.C. electromagnetic windings.

68629. United States Atomic Energy Commission. Fuel element. (8th August 1958).

68630. Bataafse Petroleum Maatschappij N.V. Method and apparatus for vaporizing liquids.

68631. American Flange & Manufacturing Co. Inc. Pouring spout construction for containers. (11th August 1958).

68632. Mount Hope Machinery, S.A. Improvements in expanding and contracting rolls.

68633. Short Brothers & Harland Limited. Improvements in gyroscopes.

68634. R. Prasad and J. Prasad. Improvements in or relating to interlocking bricks and to walls and like structures built up with such bricks.

68635. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to permanent magnets and methods of producing them.

68636. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to a device comprising an electric source of light.

68637. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to low-power electric machines.

68638. Ciba Limited. A process for the manufacture of anthraquinone vat dyestuffs. [Addition to No. 56042].

68639. Diamond Alkali Company. Chemical composition and apparatus.

68640. G. A. M. Petersen. Reversible tooth having resilient retaining means. [Addition to No. 61906].

68641. Union Carbide Corporation. Ethylene-1-olefin copolymers and process for producing same. (26th March 1959).

68642. International Combustion (Holdings) Limited. Improvements in or relating to mechanical strokers. (8th August 1958).

5th August 1959

68643. Hoover Limited. Improvements relating to suction cleaning apparatus. (12th January 1959).

68644. Hoover Limited. Improvements relating to floor scrubbing appliances. (12th January 1959).

68645. Hoover Limited. Improvements relating to cleaning apparatus. (12th January 1959).

68646. Hoover Limited. Improvements relating to electrically operated appliances. (12th January 1959).

68647. Imperial Chemical Industries Limited. Multiple-feed spray guns. (2nd September 1958).

68648. The English Electric Company Limited. Improvements in and relating to two-part electrical connectors.

68649. Westinghouse Brake & Signal Company Limited. Automatic drain valve. (13th August 1958).

68650. Chemische Fabrik Promonta GmbH. Organic compounds having as basic substituent at least one heterocyclic ring containing a nitrogen atom and process of production thereof. (26th September 1958).

68651. Standard Telephone and Cables Limited. Ferrite matrix storage. [Addition to No. 65032].

68652. C. R. Marshall. Improvements in or relating to the manufacture of textile threads.

68653. Ciba Limited. Preparations containing [3-(para-amino-benzene sulfonamido)-6-hydroxy-pyridazine] or salts thereof. [Divisional date 13th May 1958].

68654. Ciba Limited. Process for the manufacture of new antibiotics.

68655. Etablissement Indutec. (Etablissement Pour L'Industrie et La Technique). Process and apparatus for treating ores.

68656. M. M. H. Khan. Strain gauge for measuring the strength of wire or the like materials and tension applied to a wire or like materials by any prestressing machine.

#### Alteration of Date

63016. The claim to priority date 5th February 1957 has been abandoned and the application dated as of 1st February 1958, the date of filing in India.

#### Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of this Gazette of India give notice to the Patents Office in the prescribed form No. 6 of the Indian Patents and Designs Rules 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specification together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

62164. Veb Dampferzeuger. Cyclone furnace with coal dust burner. Accepted on 3rd August 1959.

*Cyclone furnace with coal dust burner for steam generators with central feed of the fuel air mixture through a whirling device arranged in the feed, a guide plate is provided at a distance in front of the whirling body.*

62536. American Cyanamid Company. Composition for preventing the infestation or improving the condition of infested domestic animals. Accepted on 3rd August 1959.

*Comprising an O:O-dimethyl-S or O-(N-alkyl carbamyl)-alkyl phosphoro dithioate compound in admixture with a non-toxic carrier.*

62941. N. V. De Bataafsche Petroleum Maatschappij. Process for the catalytic desulphurization of de-asphaltized heavy sulphur-containing hydrocarbon oil fractions. Accepted on 25th July 1959.

*Desulphurization is carried out in presence of added sulphur-containing auxiliary hydrocarbon oil having a boiling range below that of heavy hydrocarbon oil fraction to be desulphurized and in presence of hydrogen gas.*

62942. N. V. De Bataafsche Petroleum Maatschappij. Process for the catalytic desulphurization of heavy sulphur-containing hydrocarbon oil fractions. Accepted on 25th July 1959.

*Desulphurization is carried out in presence of added auxiliary hydrocarbon oil having a boiling range below that of heavy hydrocarbon oil fraction to be desulphurized and a sulphur content of at least 0.05 per cent by weight and in presence of sufficient hydrogen gas.*

62986. Eastman Kodak Company. Method and apparatus for producing beadlets. Accepted on 30th July 1959.

*By extruding fusible organic material through uniform cylindrical capillary bores into gaseous cooling medium.*

62991. J. R. Geigy A.G. A process for the separation of mixtures of metal salts. Accepted on 30th July 1959.

*The metals are specially separated in a solution prevented from free convection in which a concentration gradient of a complex forming base is produced.*

62999. International Computers and Tabulators Limited, formerly known as The British Tabulating Machine Company Limited. Improvements in or relating to apparatus for interpreting an electrical wave form. Accepted on 31st July 1959.

*Comprising means for deriving clock pulses a predetermined time delay interval after the occurrence of polarity crossovers in the waveform, means for producing clock pulses in the absence of polarity crossovers by recirculating the last derived clock pulse, means for terminating recirculation and comparing each clock pulse.*

63016. Imperial Chemical Industries Limited. Multi-stage metabolic process for the production of gibberellic acid. Accepted on 31st July 1959.

*Cultivating gibberella fujikuroi strain in two or more stages, the first being for active growth and final for gibberellic acid production.*

63037. Imperial Chemical Industries Limited. Process for the manufacture of new piperidine derivatives. (13th February 1957). Accepted on 4th August 1959.

*Reducing 4-ketopintaalkyl piperidine.*

63038. Monsanto Chemical Company. Textured plastic materials. Accepted on 4th August 1959.

*Comprises adding at least 0.5 per cent. upto but not in excess of 2.5 per cent. of liquid water to granules of thermoplastic resinous polymer.*

63048. T. Tarukawa. An apparatus for the precise weighing of a predetermined amount of any stock-material. Accepted on 4th August 1959.

*A weighing beam, a weighing tank provided with main and auxiliary discharge portions, a weight hung on balance beam, switches closing at upper and lower deviation of balance beam, a device for charging the weighing tank and discharge devices for main and auxiliary discharge portions of the tank.*

63049. T. Tarukawa. An apparatus for weighing a predetermined amount of any stock-material. Accepted on 4th August 1959.

*A weighing beam, a weighing tank provided with a discharge portion, a weight hung on the balance beam, a switch which closes when the beam lowers from balance portion, a device for charging the weighing tank and a discharge device for the tank.*

63052. L. Lesavoy. Improved machine for dispensing selected lengths of a web of either paper toweling or cloth toweling. Accepted on 5th August 1959.

*Comprising a cabinet, a turnable measuring roll a turnable friction roll turnable connected to a cover of the cabinet, said friction roll exerting pressure on the measuring roll when the cover is in its closed position.*

63061. Aktiebolaget Electrolux. Improvements in or relating to absorption refrigerating apparatus. Accepted on 5th August 1959.

*A defrosting device for an evaporator element which includes a conduit by-passing the condenser and leading from the vapour conduit of a vapour expeller to vapour element, a liquid trap in said by-pass conduit.*

63087. Merck & Co., Inc. Process for preparing novel 16-alkyl steroids. Accepted on 31st July 1959.

*16-methyl-11-oxygenated-4-pregnene-17 $\alpha$ , 21-diol-3, 20-dione is contacted with microorganisms of the class schizomycete.*

63091. E. P. Aghnides. Improvements in water aerators. Accepted on 30th July 1959.

*Casing having water inlet and outlet, a perforate member extending across said casing between said inlet and outlet and an air inlet leading into the space downstream of said member.*

63175. Gluconate Limited. Process of isolating plant alkaloids. Accepted on 31st July 1959.

*Extracting the roots of *Rauwolfia Canescens* with ethanol, concentrating the extract, and separating the alkaloid by acidification.*

63338. Standard Telephones and Cables Limited. Improvements in or relating to guides for electromagnetic waves. (8th March 1957). Accepted on 31st July 1959.

*Comprising steps of winding a metal wire on a cylindrical mandrel to form a helix with successive turns in peripheral contact.*

63587. Union Carbide Corporation. Polyether-polyacid products and method of production therefor. Accepted on 4th August 1959.

*7-97 parts by weight of an organic polyacid polymer are mixed with 93-3 parts by weight of a polyether.*

63622. Union Carbide Corporation. Welding flux composition. Accepted on 1st August 1959.

*Flux composed by weight 10-40 per cent zircon sand, 10-25 per cent periclose, 10-35 per cent Rutile, 2-8 per cent cryolite, 0-20 per cent silica, 0-20 per cent alumina, 0-8 per cent Ferro-alloy, 0-16 per cent silicomanganese, 0-20 per cent Magnetite, 10-30 per cent iron powder, and 1-4 per cent sodium silicate.*

63681. Hilmor Limited. Improvements in or relating to tube bending machines. (10th April 1957). Accepted on 1st August 1959.

*The combination of a frame-arm structure comprising a frame-arm plate, a forming tool mounting intermediate the ends of the frame-arm plate and adapted to have a forming tool pivotally mounted in it.*

63734. The British Drug Houses Limited. Colour stable tablets. (24th April 1957). Accepted on 31st July 1959.

*Comprising acetylsalicylic acid, codeine, silicone fluid of 1000 to 1000,000 centistokes viscosity and talc.*

63834. The British Drug Houses Limited. Method for the preparation of 3  $\beta$ -hydroxy-6-methyl- $\Delta^5$ -steroids. (3rd May 1957). Accepted on 30th July 1959.

*6- $\beta$ -hydroxy or 6- $\beta$ -acyloxy-3:5-cyclosteroid is oxidised, the resulting 6-oxo-3:5-cyclosteroid is treated with a methyl organometallic reagent and the product is rearranged.*

63846. P. Runchhoddas. Improvements in or relating to spinning wheels. [Addition to No. 59324]. Accepted on 30th July 1959.

*The jokey pulleys are mounted on one arm of an angle-shaped pin, the other arm of the said pin being engaged by hook or eye of a coil spring wound around a fixed pin.*

64152. General Electric Company. Stator vane assembly. Accepted on 30th July 1959.

*Includes an annular casing made up of at least two casing segments, and an annular stator vane ring mounted in said casing.*

64208. Union Carbide Corporation. A process for preparing graft copolymers of polyethylene and a polymerizable organic monomer. Accepted on 30th July 1959.

*Comprises reacting an activated polyethylene obtained by subjecting polyethylene to ionizing radiation with a polymerizable organic monomer.*

64256. United Merchants and Manufacturers, Inc. Textile colouring emulsions. Accepted on 4th August 1959.

*Emulsion consists of an outer water phase having dissolved therein a water soluble formaldehyde sulphonylate reducing agent and a water soluble caseinate or soyabean proteinate which inhibits oxidation of said reducing agent.*

64384. Montecatini Societa Generale Per L'Industria Mineraria e Chimica and K. Ziegler. Process for purifying high molecular weight olefin copolymers. Accepted on 4th August 1959.

*Emulsifying a solution of copolymer of  $\alpha$ -olefins in a hydrocarbon solvent with an aqueous mineral acid, removing the aqueous layer and emulsifying the other layer.*

64385. Montecatini Societa Generale Per L'Industria Mineraria e Chimica and K. Ziegler. Improved thermoplastic materials. Accepted on 4th August 1959.

*Consist of crystalline polypropylene in admixture with a solid propylene-ethylene copolymer.*

64424. Nagynyomasu Kiserleti Intezet. Improvements in the process for the treatment of asphalt containing mineral oils and of other asphalt containing hydrocarbonaceous mixtures poor in hydrogen to produce light and middle oils, with simultaneous refining of the motor fuels obtained. [Addition to No. 53233]. Accepted on 4th August 1959.

*The reaction product is separated in the hot state from heavy oil fraction with the moving catalyst and the fine grained coke, and the vapour phase fraction with hydrogen containing gas is conducted through reactors to effect refining hydrogenation at 1–100 atmospheres.*

64457. Council of Scientific and Industrial Research. A process for the manufacture of malted milk powder. Accepted on 5th August 1959.

*Mixing concentrated malt extract with milk powder fat and carbohydrates and drying in vacuum driers.*

64538. SKF Kugellagerfabriken Gesellschaft mit beschränkter Haftung. Improvements in or relating to bearing arrangements for the bottom rolls of

textile drafting mechanism. Accepted on 4th August 1959.

*Comprising a rolling bearing mounted in a bearing bracket which is open at the top and is fixed to the machine frame which rolling bearing is sealed at its ends.*

64742. Plastic Corporation. An improved key ring. Accepted on 5th August 1959.

*Made of plastic material of desired section and thickness and bent to the required shape the free ends thereof being coupled to each other through a coupling member.*

64862. Kyowa Hakko Kogyo Kabushiki Kaisha. A method of producing citric acid by fermentation. Accepted on 1st August 1959.

*Cultivating Trichoderma viride in culture medium containing carbohydrates nitrogen sources and inorganic mineral sources.*

65009. Glaxo Laboratories Limited. Improvements in or relating to the production of  $\beta$ -ionone. (30th August 1957). Accepted on 4th August 1959.

*Cyclising pseudo-ionone in the presence of sulphuric acid and diisopropyl ether.*

65032. Standard Telephones and Cables Limited. Ferrite matrix storage device. Accepted on 5th August 1959.

*Comprising ferrite storage elements arranged in lines and columns, lines wires each of which threads all the elements of one of the lines and column wires each of which threads all the elements of the columns, a storage element actuated for writing or reading, a reading common to all storage elements and connections to column or line wires.*

65098. SKF Kugellagerfabriken Gesellschaft mit beschränkter Haftung. Improvements in or relating to textile drafting mechanism. Accepted on 30th July 1959.

*A latch is provided in the stationary part of the drafting mechanism, the latch having detent members which can automatically come into the locking position.*

65483. J. Hantych and Jyoti Prasad Mukherji. Improvements in or relating to hydraulic couplings. Accepted on 31st July 1959.

*In which the driving and the driven member are so designed that their opposed faces consist of spherical planes and centres coincide with the centre of swing.*

65629. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to thermal switches. Accepted on 4th August 1959.

*A thermal safety switch is connected in parallel with the heating element and reduces its contact distance, upon being heated and closes before an unduly high temperature of a part of the main switch is reached.*

65659. Excel Industries. Improvements in or relating to process of and apparatus for manufacture of mercuric chloride and mercurous chloride. Accepted on 30th July 1959.

*Metallic mercury and elementary chlorine are reacted together at elevated temperature of 300 to 500°C and the product formed is collected from the reaction mixture.*

65811. Imperial Chemical Industries Limited. Production of silanes. (4th December 1957). Accepted on 1st August 1959.

*Reacting an organopolysiloxane with an organoaluminium compound.*

65930. D. M. King. Improvements in or relating to chain guards for electrically operated hoist pulley block. (26th November 1957). Accepted on 30th July 1959.

*Incorporating two rockable guard elements arranged about the hoist block sprocket.*

66050. Western Electric Company, Incorporated. Improvements in or relating to processes for the continuous zone-refining of materials. (13th January 1958). Accepted on 28th July 1959.

*Redistributing the ingredients of a fusible material containing at least two ingredients at least one of which has a segregation coefficient other than unity by causing relatively hot and cold regions alternately spaced to progress in one direction through atleast a portion of the material within the receptacle.*

66227. Svenska Aktiebolaget Bromsregulator. A control valve for a fluid pressure operated servomotor in fluid pressure brake systems for vehicles, particularly railway vehicles. Accepted on 24th July 1959.

*Comprises a valve housing having three-ways, a system of movable parts and spring means within said housing.*

66247. S. Takita. Device for locking a loading arm of a draft device in spinning machines. Accepted on 27th July 1959.

*A loading arm of an inverse U-shape section, a hook member, a pin loosely fitted across both sides of the loading arm with an eccentric sheave, and a lever pivotally mounted on the said sheave.*

66330. Knorr-Bremse G.m.b.H. Improvements in or relating to vacuum brakes. Accepted on 25th July 1959.

*Comprising a first vacuum train pipe controlled by a driver's vacuum brake valves, a controlled valve device having pressure responsive means.*

66538. Birfield Engineering Limited. Improvements in or relating to torque limiting clutches. (30th January 1958). Accepted on 27th July 1959.

*Comprises driving and driven elements and a spring member arranged substantially co-axially one within the other.*
